SUBJECT: COMMUNITY PROFILES

Attached are the profiles for the top forty communities which I have been working on. As you will see in looking through, there is variable information in place for the different communities. In the next month I should be able to update the annual campaign and education allocation figures. As I have shared with you elsewhere, the data available from CJF on endowment fund and foundation sources is so broad that it is probably unusable for our purposes.

My next step would be to share these with Jon Woocher and his staff on a confidential basis to see what they might be able to add in the way of information on local planning efforts or special grants in Jewish education. Please let me know if I should proceed with that.

## NOTES TO TABLE

This table illustrates how estimated actual totals were calculated for endowment fund component ending balances, total grants and distributions and total additions. These calculations are necessary for two reasons:

- A. Several Federations reported their totals, but did not report the breakdowns by type of endowment fund component.
- B. Several Federations with endowment assets did not complete a 1988/89 survey.

The first line shows 1988/89 estimated actual totals.

The second line shows the totals from each component fund.

The third line shows totals reported from Federation that did not provide breakdowns.

The fourth line shows totals for all Federations that reported in 88/89. The figures include pro rata estimates for the totals on line 3 calculated as follows:

EXAMPLE: 18.6% of endowment funds, for which a breakdown was provided, were unrestricted. We assumed that 18.6% of the funds for which no breakdown was provided was also unrestricted. The formula was  $\$333,568,760 + (\$14,500,057 \times 18.6\%) = \$335,890,505$ .

Line 5 shows the estimated actual 1987/88 totals for Federations that did not report in 1988/89.

Line 6 is the estimated actual total. These figures are the closest possible approximation to the actual totals of all Federations.

Line 7 shows the net percentage change between 1987/88 and 1988/89 figures.
