Adam and Ellen,

Concerning the draft "Coding Instructions for the CIJE Educators Survey", there are specific issues that either you should be aware of or I'd like your input on. They are as follows:

1. I envision that the Coding Instructions will be produced in a manner similar to the Manual:
- 3-ring binder with plastic cover,
- in the following order:
     - title page with acknowlegment (in white),
     - list of the following sections (in white),
     - Overview (in ivory),
     - Questionnaire Variable List with section title page (in white or
green??),   - Supplemental Variable List with section title page (in grey,
green, or blue??).

NOTE: The draft that you have has the last two sections in REVERSE order. Also, I have not included the title pages.

2. I renamed many of the variables, so that (a) groups of variables from the same question have variable names that begin with the same few letters and (b) the content of the variable can be (better) understood from the Variable Name. [Though we have become used to Nancy's variable names, I initially found them byzantine.]

3. There are open-ended parts of three questions on the revised survey that were not on the original survey:
Q# 29 - For what reason are workshops required?
Q# 52 & 53 - From where did you recieve (are you recieving) your certification?

For Q#29, I created a set of (yes-no) variables covering the possble responses educators may give. DOES MY LIST OF VARIABLES INCLUDE ALL REASONABLE RESPONSES?

For Q#52 & 53, I created seperate variables for each type of certification, listing the possible places (values) from which one can be certified or licensed. Notably, the list of possible values for Jewish education is different than general education. AGAIN, DOES MY LIST OF VALUES FOR THESE VARIABLES COVER WHAT WE THINK WILL BE THE MOST COMMON RESPONSES?

4. For the MAJOR* variables, I have provided two alternative lists of possible values to be found in MAJOR1A and MAJOR1B. WE NEED TO CHOOSE ONE OF THESE OPTIONS OR ANOTHER VERSION. Ideally, I'd like to keep the list as short as possible and focused on what the variables will be used for.

It seems to me that the values (i.e., that Reading = 14, Business/Finance majors are in the 400's, etc.) come from someplace. DO YOU KNOW FROM WHERE?

5. I don't like the word "SUPPLEMENTAL" to descibe the variables that are

Adam and Ellen,

In making the revisions to the Coding Instructions, I have concerns about two
decisions we made. I don't intend to re-argue what we had already discussed.
Rather, I don't think we actually addressed the specific issues delineated
below.

1. Regarding Q#29, REASONS WORKSHOPS ARE REQUIRED: we decided to have two
variables (in case they gave more than one response) with each containing values
for the range of likely responses to this question.
PROBLEM: Assuming that a couple of educators do give more than one response, the
resulting two variables would not produce (without additional computations)
meaningful information.
SUGGESTED SOLUTION: Similar to my original suggestion, I advise having five
different variables: one for each of the four likely responses (i.e., school
contract, state license, national board certification, local board/agency

Press RETURN for more...

MAIL>

certification) and "other". Each of these variables would yield meaningful
information (e.g., percentage of educators who are required by school contract
to take workshops) without additional computations. One could still do
additional computations, if desired. Moreover, this would follow the pattern we
have used in Question #12 on what grades one teaches.

2. For both question #29 (REASONS WORKSHOPS REQUIRED) and #12 (GRADES TAUGHT):
What value names should be employed?
     - Since they do not check the item, "Not checked/Checked" seems
inappropriate.
     - As does "No/Yes"" (which you have pointed out previously).
     - How about "Not Indicated/Indicated"?
OTHER SUGGESTIONS?

CODING INSTRUCTIONS FOR THE
CIJE EDUCATORS SURVEY

(handwritten: Pilot w/ Chicago)

(handwritten, top right, illegible)

OVERVIEW

After you have administered the *CIJE Educators Survey* (found in the *Manual for The CIJE Study of Educators*) in your community, you will need to analyze carefully the responses of your Jewish educators to the questionnaire. The *Coding Instructions for the CIJE Educators Survey* will assist you in this process.

The *Coding Instructions for the CIJE Educators Survey* consists of two parts:
- The *CIJE Educators Survey Questionnaire Variable List*
- The *CIJE Educators Survey Supplemental Variable List*

(handwritten: Composite)

The *CIJE Educators Survey Questionnaire Variable List* will aid you in entering the information gathered through the *CIJE Educators Survey* into a commercially available statistical software program. It contains a list of variables (including variable label, possible values, value labels, and user-assigned missing value) into which the educators' responses to the questionnaire can be entered. A diskette containing an SPSS for Windows (Release 6.0.1) data file with these variables already defined is available from the NY office of CIJE upon request.

(handwritten: Compos. + Van l. st)

(handwritten: stet) The *Coding Instructions for the CIJE Educators Survey* provides directions for reorganizing the information in a manner that allows for easy understanding of key issues concerning your Jewish educators. These key issues include:
- Hours employed
- Current position(s)
- Early Jewish education
- Formal training in general education, Jewish studies, and administration

NOTE: If you have modified the *CIJE Educators Survey* to suit the particular needs and resources of your community, you may need to adjust the directions provided in both sections of the *Coding Instructions for the CIJE Educators Survey*.

The ~~SPSS~~ *SPSS* studs package.

The *Coding Instructions for the CIJE Educators Survey* is designed to be used by the **study coordinator** or a research assistant with expertise and experience in statistical analysis. (See the *Manual for The CIJE Study of Educators: Overview*.) If you need any further assistance, please contact the NY office of CIJE.

CIJE EDUCATORS SURVEY
QUESTIONNAIRE VARIABLE LIST

The **CIJE Educators Survey Questionnaire Variable List** contains a list of variables into which the educators' responses to the **CIJE Educators Survey** can be entered. For each variable in the list, the following information is provided: variable name, variable label, possible values, value labels, and user-assigned missing value (if applicable). The information is provided in the following format:

VARIABLE NAME   Variable Label [beginning with question number, when applicable]
      Missing Values [Optional]
      Values   Value Labels [Optional]

e.g.

For some variables additional information on coding is provided. For example, in some questions (i.e., question #10 concerning the positions educators hold in each school), the educator is requested to check every item that applies. In these cases, there is a separate variable for each possible item (i.e., Teacher, Teacher's Aide, Educational director or principal, etc.). Each variable is to be coded as 0 (no) if not checked or 1 (yes) if checked. Only if an educator did not check any item in response to the question are all the variables associated with that question to be coded as 9 (missing).

Since many questions offer the opportunity to indicate "other", you may find that educators provided responses that are not listed below as an assigned value within a variable or as a separate variable. If a substantial percentage of educators have indicated the same "other" response, you may want to assign an additional value to the particular variable or include an additional variable. **Remember**: If you add an additional value or another variable to the data file, you may need to adjust the computing and recoding instructions found in the next section.

Ompos. P

The computing and recoding instructions in the next section, **CIJE Educators Survey Supplemental Variable List**, are based on the variables listed below. For instance, to create a new variable (TRAIN), which provides summary information on the training of educators, you use the following variables: DEGREE1, MAJOR1A, MAJOR1B, DEGREE2, MAJOR2A, MAJOR2B, DEGREE3, MAJOR3A, MAJOR3B, CERTJED, and CERTGEN. Thus, it is important to input the data from the questionnaire into a commercially available software package using the precise variable names and assigned values detailed in this section.

QUESTIONNAIRE VARIABLE LIST

The values for the following two variable (CAMPUS and PERSON) were to be written on each survey by the study coordinator and the person in charge of administering the questionnaire at each school, respectively. CIJE EDUCATORS SURVEY
COMPOSITE SUPPLEMENTAL VARIABLE LIST

</div>

The *CIJE Educators Survey Supplemental Variable List* contains a list of variables that can provide important, summary information about your educators. These variables, based on the variables listed in the *CIJE Educators Survey Questionnaire Variable List*, are created by following the specific computing and recoding instructions detailed below. For each variable in the list, the following information is provided: variable name, variable label, possible values, value labels, user-assigned missing value, and computing/recoding instructions. The information is provided in the following format:

VARIABLE NAME   Variable Label
